

Subject Line - Test this treat to eliminate your dog's anxiety

It's the middle of the day and you're hard at work at the office when you get a text from your neighbor in the apartment next door.

"Hey Kate, it's Sam, your next door neighbor. I don't mean to be rude but your dog has been barking and howling nonstop for the last three hours and it's impossible to get any work done..."

Great. As if the regular work day wasn't stressful enough, now your four-legged friend is bringing the stress home.

Around 14% of dogs suffer from separation anxiety and that number is expected to increase drastically once we all start going back to the office after being in lockdown for a year.

I used to be in the same position as Kate and had no idea how to fix this...

That's when a friend of mine recommended Suzie's CBD Treats.

This made a HUGE difference for me and my puppy!

He went from high-strung, best barker in the apartment to Mr. Calm and Cool in less than one week.

Don't believe me? Check out this before and after video of us using Suzie's CBD Treats!

If your puppy suffers from any type of anxiety, whether that's separation anxiety, car rides, or loud noises, then you owe it to them and yourself (and your neighbors!) to give Suzie's CBD Treats a try.
